

Product Installation Instructions

Pipe Wrap Insulation

To complete installation, you will need:

- Pipe wrap
- Duct tape (optional)

Instructions

TO INSTALL

1. Before installing pipe wrap, make sure the pipe is clean and dry.
2. Using the pre-cut slit, wrap the pipe wrap insulation around the pipe.
3. Remove the plastic from the adhesive on the pre-cut slit and press both sides together after placing it around the pipe.
4. If necessary, secure the insulation with duct tape.
